

The Rutgers School of Nursing -  
François Xavier-Bagnoud (FXB) Center  
presents:

# Webinar: Health Literacy: Interpreting and Communicating HIV-related Lab Results

**THURSDAY, OCTOBER 17TH @ 11AM ET**

## LEARNING OBJECTIVES

- Define HIV viral load suppression.
- Describe undetectable equals untransmittable (U=U) as an HIV prevention method.
- Articulate HIV-related laboratory test results and values, including HIV viral load and CD4 count.
- Discuss strategies to improve medication adherence among people with HIV (PWH)

## SPEAKER

Austin Greitz, DIS

Facilitator,  
New Jersey HIV Training &  
Capacity Development Program  
(NJTACD)

This 60-minute webinar is intended for providers with prescribing privileges, nurse professionals, Medical Case Managers, and other HIV care team members who are new or existing to HIV care.
